

Deliver Microsoft 365 & Copilot at Scale

The multi-tenant management platform for MSPs to sell, secure, and support at scale.

The MSP Paradigm Shift

INFRASTRUCTURE

The tenant is the new server.

Microsoft 365 tenants must be continually monitored, maintained, supported, and secured to unlock their enterprise-grade potential.

SECURITY

Identity is the new perimeter.

End users pose a significant security threat. Proper identity verification, access control, and data labeling are non-negotiable.

OPERATIONS

Multi-tenancy is the new necessity.

Managing just one tenant is complex. Microsoft pushes multiple updates per month, making configuration across multiple customers an urgent priority.

GROWTH

AI is the new opportunity.

SMBs want AI efficiency. MSPs must enable Copilot securely, effectively, and consistently to remain competitive.

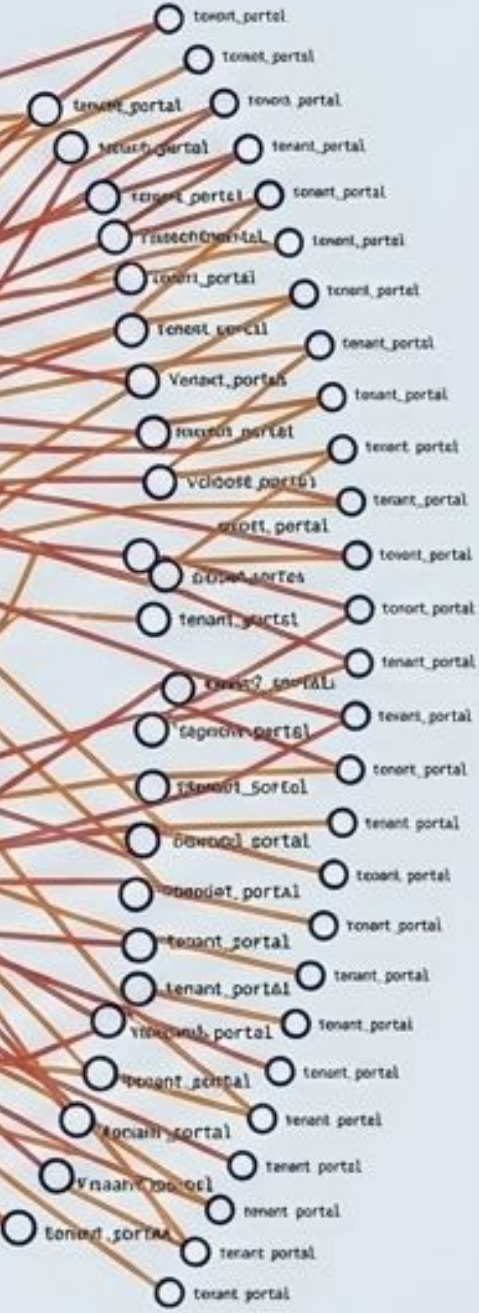

The Multi-Tenant Management Dilemma

MSP OPERATOR

Compounding Complexity
Manually navigating multiple, distinct portals for every client.

Constant Flux
Keeping pace with Microsoft's multiple monthly significant updates across all tenants.

Configuration Drift
High risk of human error and undocumented changes leaving environments vulnerable.

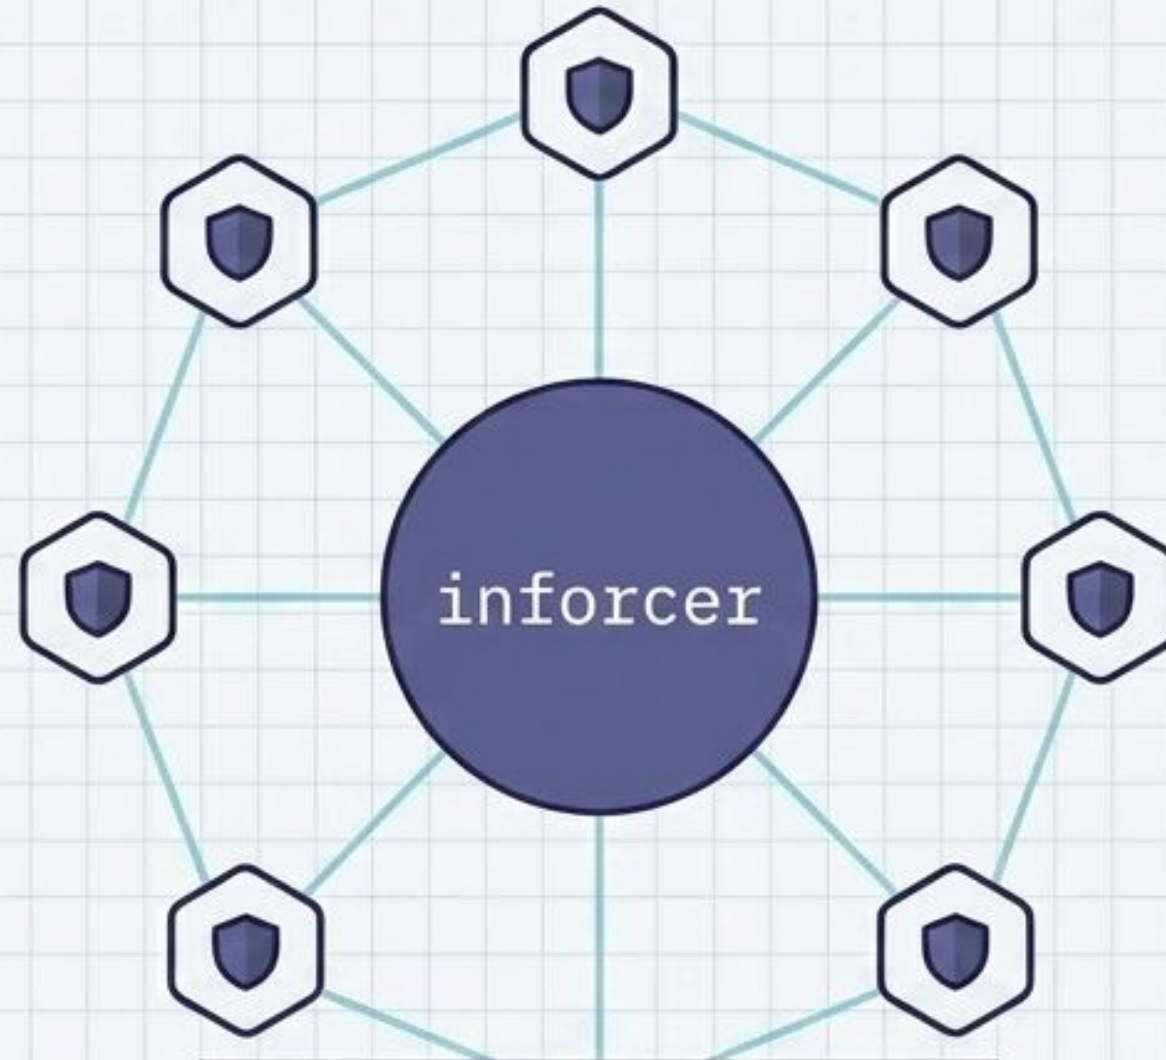

Diagnostic: Manual Overhead vs. Automated Scale

	Legacy Manual Management	Inforcer Platform
NAVIGATION	Disjointed navigation across multiple tenant portals.	 Single, centralized pane of glass.
SECURITY UPDATES	Manual, per-tenant application of settings.	 Scale deployment across the entire customer base.
COMPLIANCE	Time-consuming guesswork and manual checks.	 Automated tenant assessments against trusted frameworks.
MONITORING	Reactive discovery of vulnerabilities.	 Continuous drift monitoring via PSA alerts.

Centralize, Organize, Structure, and Secure

The engine to optimize the Microsoft 365 experience and deliver peace of mind.

Save Time
Reduce compounding manual effort.

Eliminate Error
Automate complex policy deployments.

Deliver with Confidence
Provide enterprise-grade security effortlessly.

Core Capability Architecture

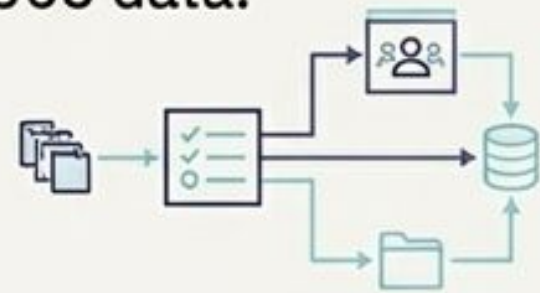

01. STANDARDIZE AT SCALE

Manage across multiple tenants.
Monitor and update security from a centralized pane of glass.

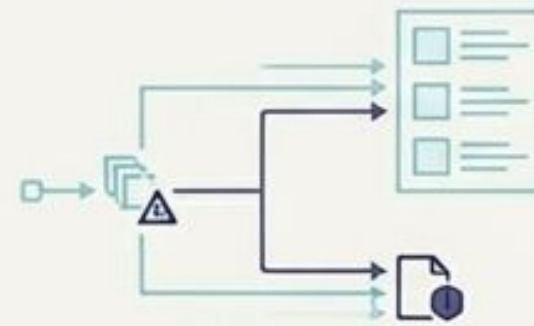

02. SECURE M365

Leverage native, enterprise-grade security.
Control group and user access.
Properly govern M365 data.

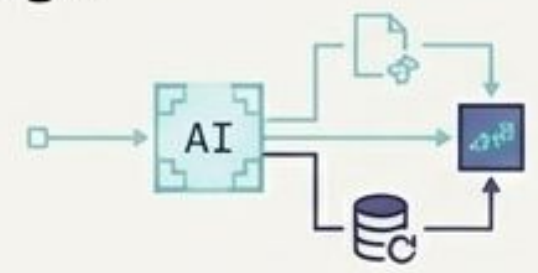

03. ENSURE COMPLIANCE

Assess tenant configuration against trusted frameworks.
Mitigate risk while surfacing new opportunities.

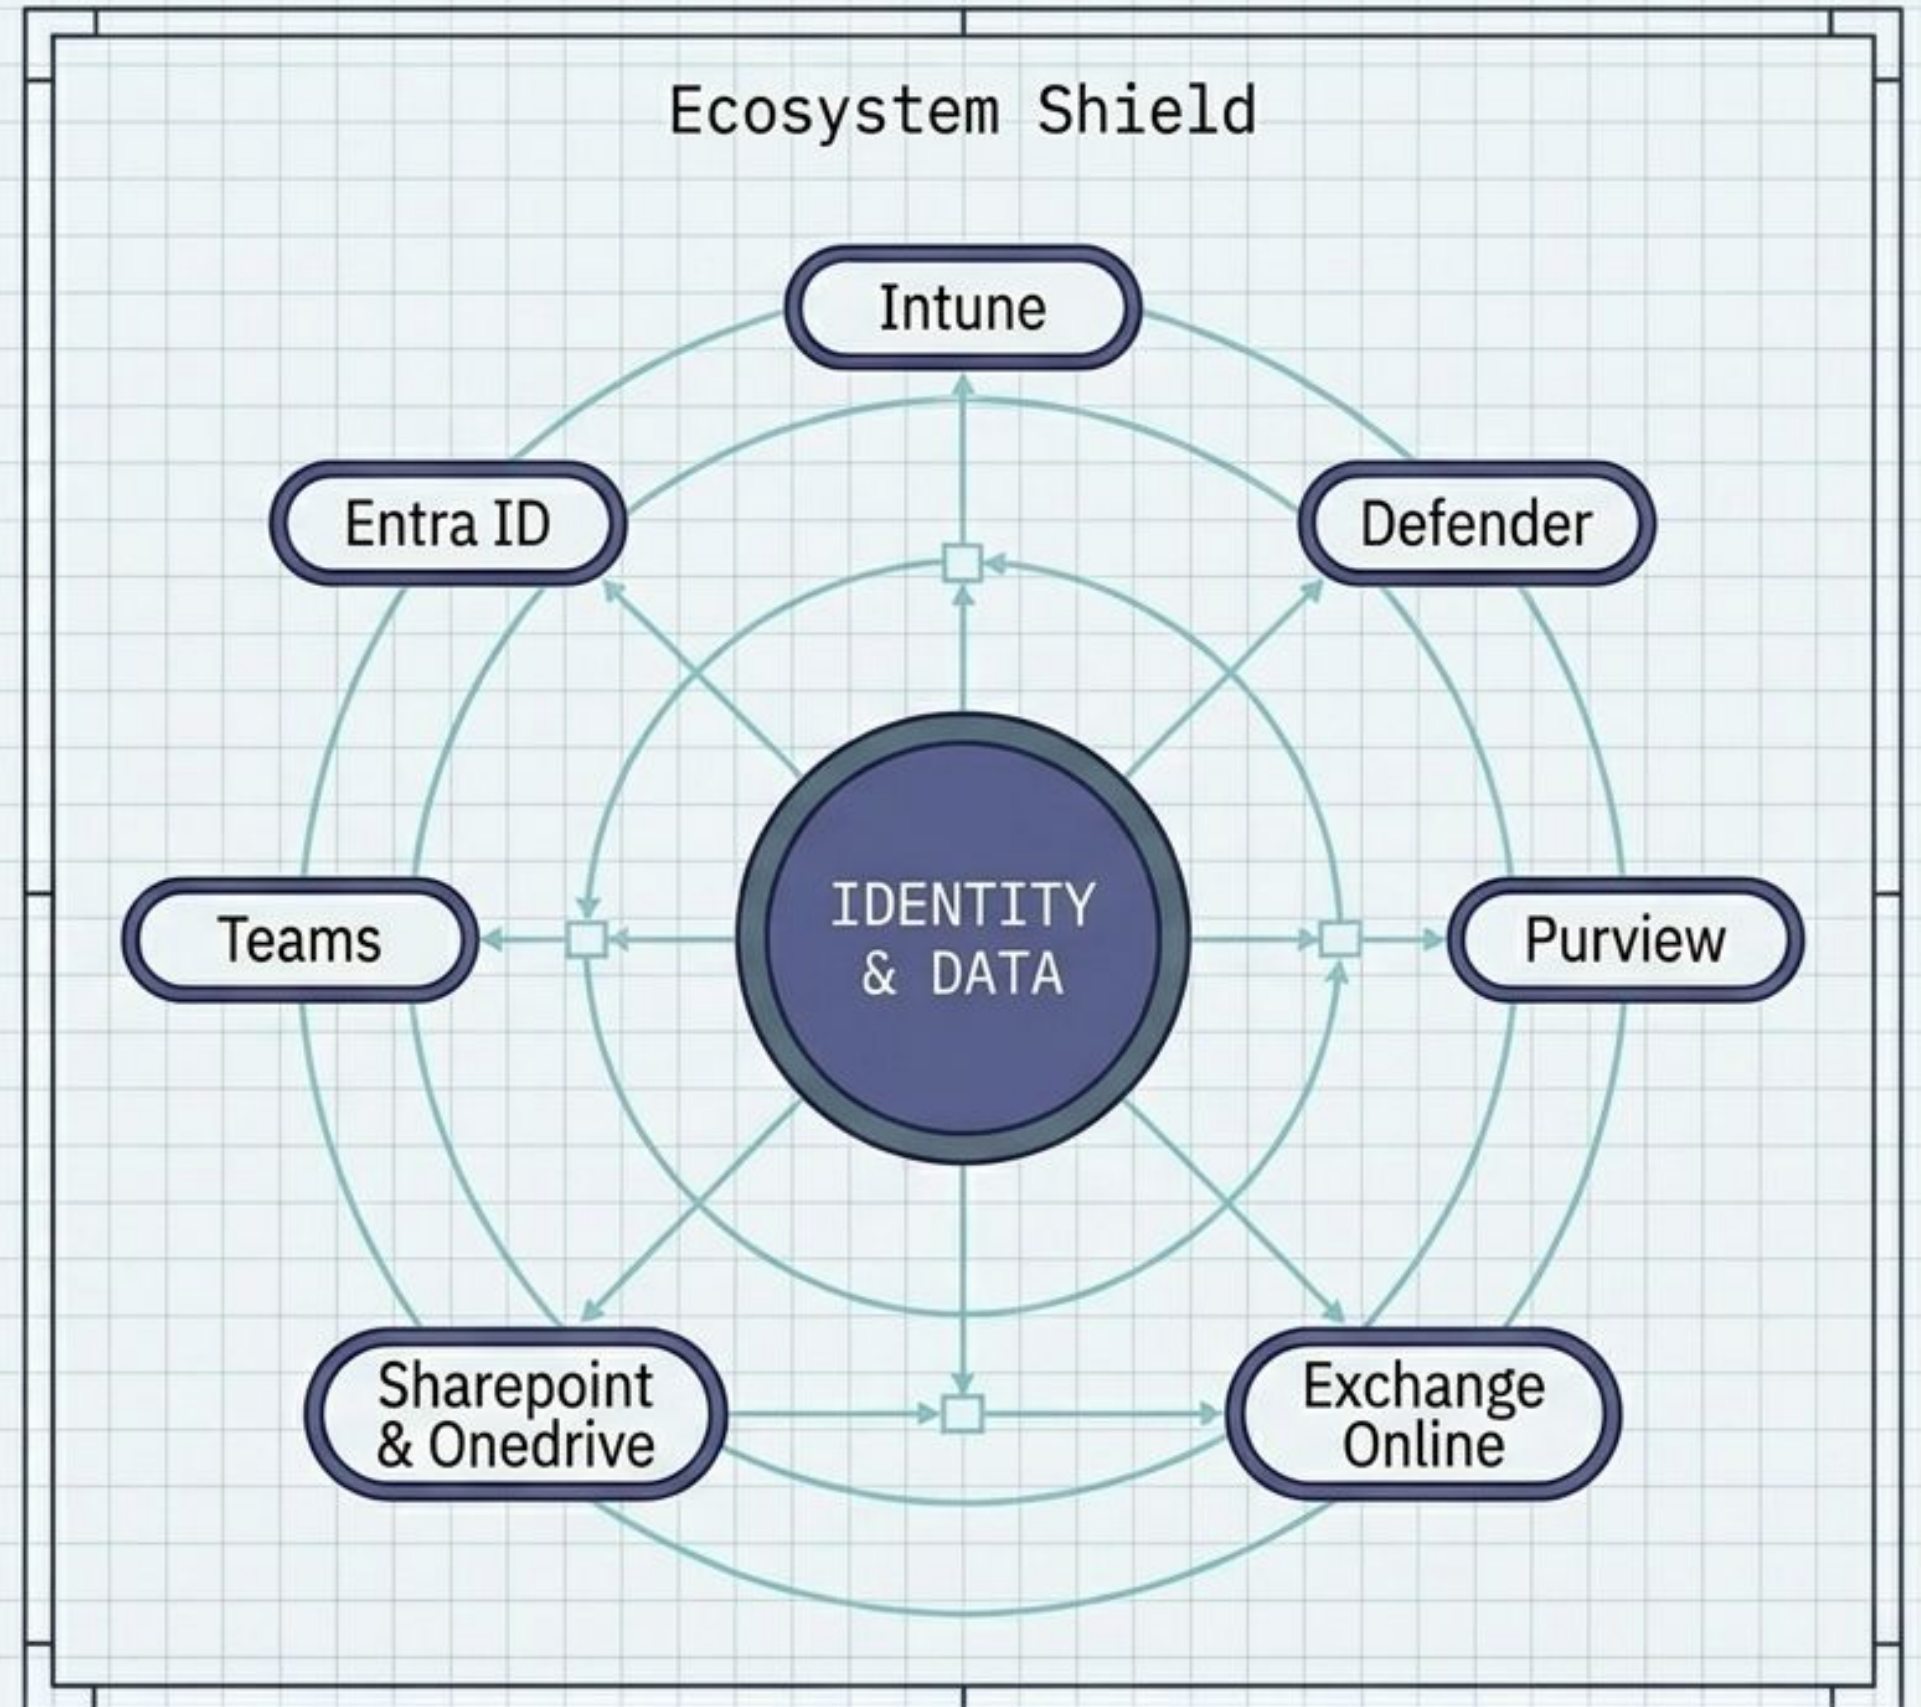

04. ENSURE COPILOT DELIVERY

Assess customer AI readiness.
Generate recommendations for rollout.
Manage ongoing AI usage.

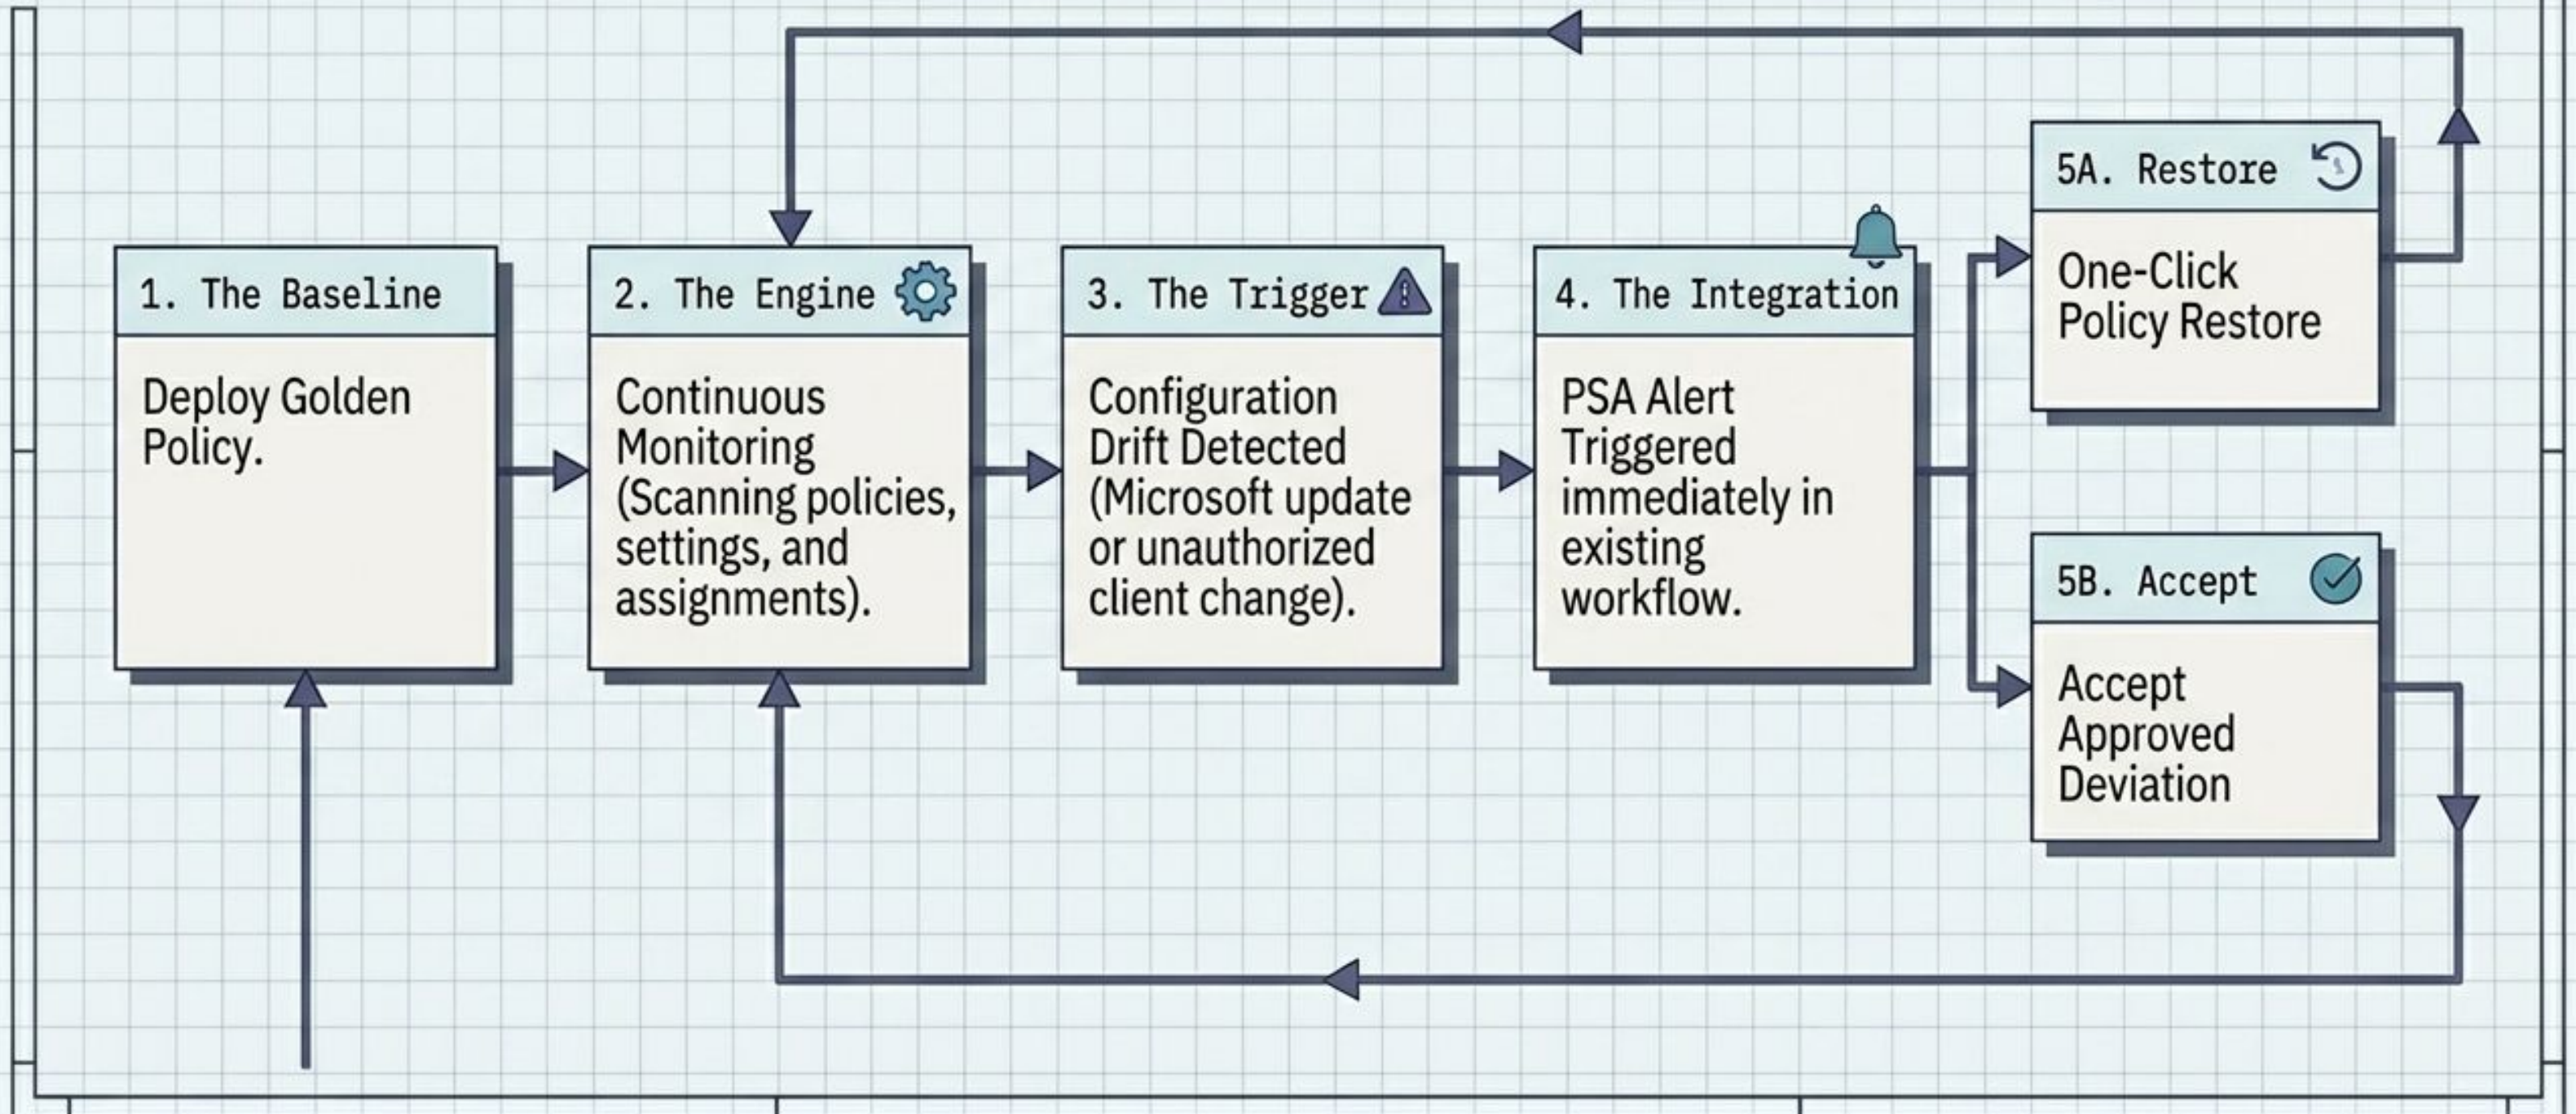

Total Ecosystem Enforcement

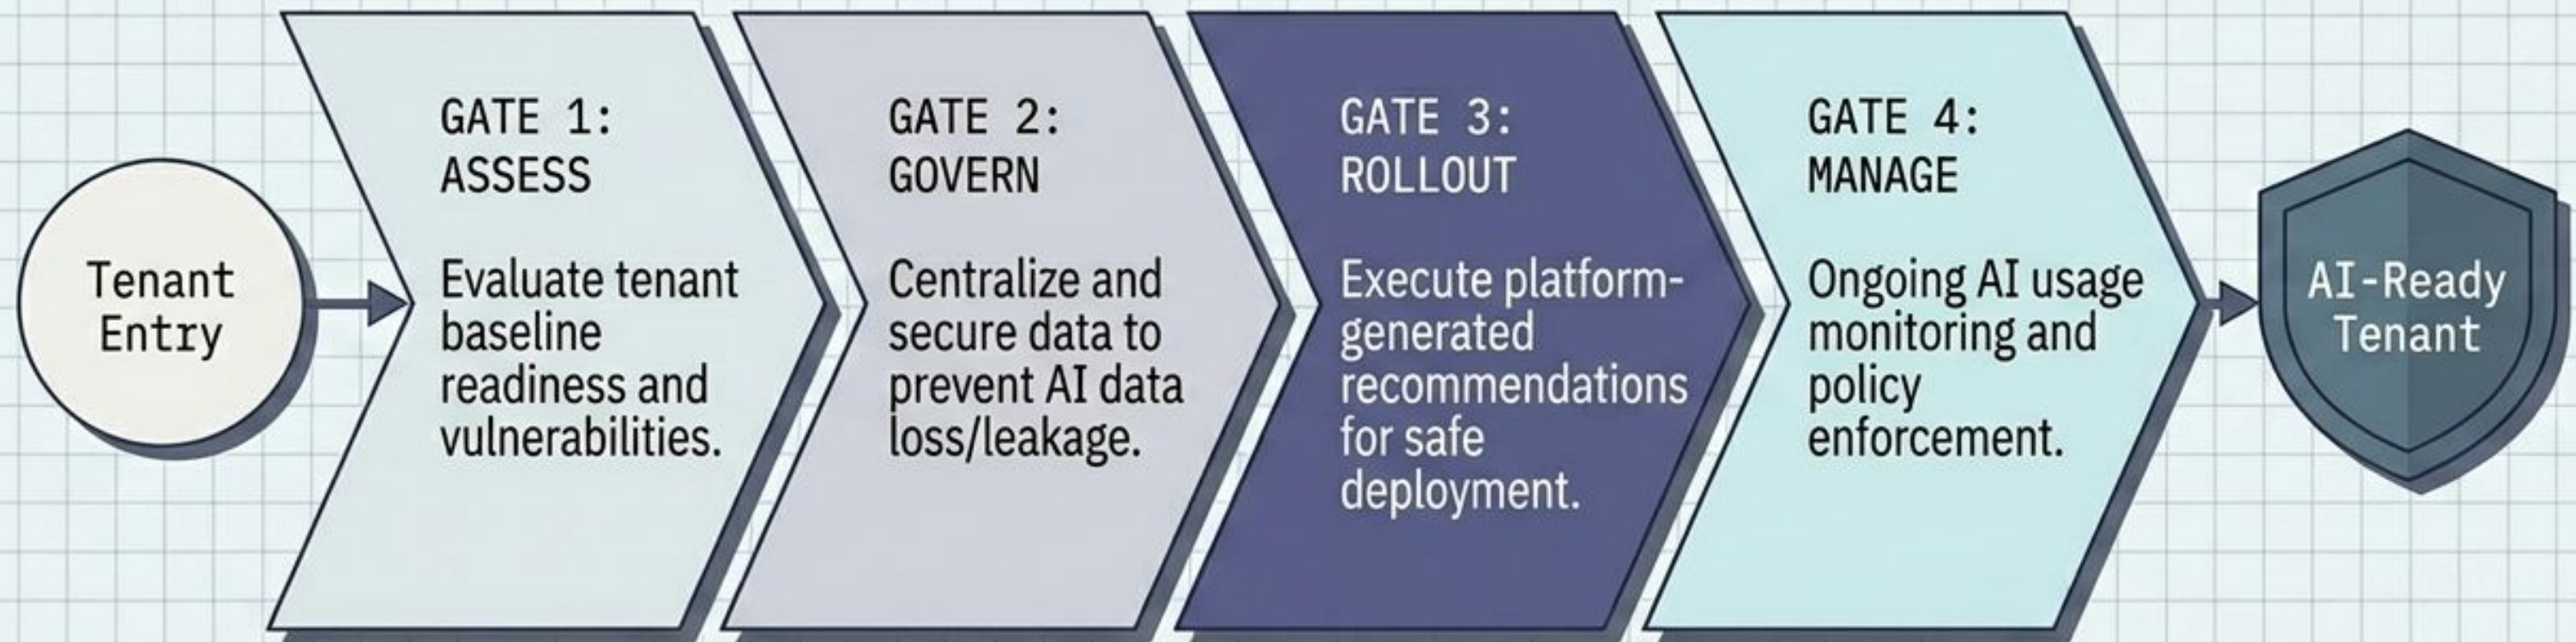

Protect the new perimeter by locking down policies across the entire Microsoft suite.

...unlike other platforms that try to be everything to everyone, inforcer stood out as a **PURE SPECIALIST**. Their focus on doing one thing exceptionally well, policy alignment and tenant security, was exactly what we needed.

Daniel Gough
SYSTEMS ENGINEER

...gives us the opportunity to streamline our Microsoft 365 security work and offers **TENANT BACKUP**... it has definitely made life a lot easier.

Lars Hørlyck Sørensen
CYBER SECURITY SPECIALIST

I rave about inforcer purely because it just **SAVES SO MUCH EFFORT**. Even if it wasn't part of their security solution, I would install it for any new client simply as part of the onboarding process.

Paul Sexstone
